Therapeutic Effects of Functional Foods on Cardio-Metabolic Health Risks in Adults

Arpita Basu, Ph.D.
Dept of Nutritional Science, OSU

Friday, Mar. 14th, 12:15-1:15
OSU Center for Health Sciences
Room D107, 1111 West 17th Street, Tulsa
Light lunch provided. View in Stillwater at ITLE.

At the conclusion of this seminar participants will be able to:

- Understand how different bioactive compounds in functional foods influence risk factors of cardiovascular disease (CVD) in adults.
- Describe how green tea and berries modulate cardio-metabolic risks in clinical studies of the metabolic syndrome.
- Consider the implications of these findings in the recommendations of medical nutrition therapy for diabetes and CVD.
